

baskets, totes, tubs & accessories:

baskets

Quality 100% polypropylene material offers strength and durability to these handsome baskets. They have strong plastic handles molded for comfortable and easy carrying, which fold away neatly when the baskets are used in the EZcart. Their large capacity allows customers to carry more and helps increase sales, and they stack economically (1.5"), allowing more baskets to be stored in less space. The baskets have modern styling for a clean professional look and extra large logo panels to prominently feature company logos. They are available in a wide range of colors.

Custom logos are available
